

Proud to be Aboriginally Owned

WHO WE ARE

MISSION STATEMENT

Learning from yesterday to preserve our tomorrows.

VISION

Through our engaging and flexible training, fluid staffing solutions, and passion for local community, iSafety aims to pioneer a culture focused on safety, progress and sustainability.

- iSafety's commitment to sustaining high standards in health and safety is an important measure of success in every single project we undertake. iSafety Ltd. is dedicated to running all its services safely and responsibly and conducts business in a manner that provides and maintains the safety and health of employees, subcontractors, clients, visitors and the public.

Training

- Our goal is to provide employees with the knowledge, training and safety programs needed to work safely in an environment free from hazards.
- iSafety Ltd. offers a selection of flexible options to meet your needs and consistently provide you with the quality training you and your workers need.

Instructors

- Our instructors are industry men and women who can relate to the people they teach. Using stories and anecdotes from their time in the field, they are able to convey the course information in a way the participants can understand and remember. More importantly, our instructors care. A certificate is meaningless if the workers don't understand and practice what is presented to them, and our instructors go out of their way to make sure everybody leaves the course with the knowledge required to keep them and their co-workers safe.

WHAT WE TEACH

- OSSA Fall Protection
- OSSA EWP
- OSSA Fire Watch
- OSSA Confined Space
- Rigging & Hand Signaling
- Overhead Crane
- Zoom Boom
- Fork Lift
- APR
- RPE
- Skid Steer
- First Aid & CPR (also HCP)
- Bear Awareness
- Gas Detection
- Flagger Training
- Over 200 online courses

Classroom-Based Training

- The iSafety training facilities in Edmonton, Fort McMurray and Calgary provide a comfortable environment for seasoned instructors to facilitate our proven courses. Join one of our already existing courses (based on seat availability) or let us schedule one specifically for you.

On-Site Training

All of our instructors are mobile and able to instruct at a site and time of your choosing. Save your workers the time, liability, and trouble of traveling to one of our locations, and ensure that they get trained on the equipment they actually use on a day-to-day basis by having our instructor come to you.

Custom-Built Training Schedule

Do you want a regular schedule to get your people trained? iSafety can help you with that. We can schedule courses at a location of your choosing, on days of the week (or month) that specifically meet your needs. Custom pricing options are also available to be discussed based on what you are looking for.

Health and Safety Programs

iSafety is a company that specializes in Health and Safety program development and maintenance. Whether it is the development of a comprehensive Safety Management System program, individual program elements such as Safe Work Practices and Procedures, Hazard Assessments, or conducting a gap analysis to troubleshoot for program deficiencies; we have a proven track record with organizations of all sizes and industries.

With over 25 years combined experience in all industries including Emergency Response, our desire is to create a top notch Safety Management System that is both efficient and effective that will assist you in implementing solutions. Our priority is to ensure that the needs of our clients are met.

Train the Trainer

Do you already have an excellent trainer on your staff that just needs the right course material? Let iSafety put them through our Train the Trainer (TTT) courses to prepare them to teach our material and issue industry recognized certificates. Our TTT courses, like our regular ones, can be done when and where you want them.

Online Training

While not instructor lead, our online library boasts over 200 courses built and meeting Alberta standards. Online courses offer a convenience that is hard to beat, and our Learning Management System can be set up with a custom portal for you to manage not only the online courses, but your instructor-lead and proprietary courses as well.

On the following page you will find a general price list that covers the majority of our course offerings, as well as our classroom-based training, on-site training, night-shift, and TTT prices. Our online courses are covered in more detail in the attached catalogue, and the custom-built option is something iSafety could discuss with you in more detail at your convenience.

Develop and Update

We work with each client to identify what their needs are while identifying their risks. Dealing successfully with the identified risks and hazards and evaluating their potential impact and developing the appropriate controls.

HSE Managers

- Our Managers have numerous years of experience of service in the oil sands working for or with Major clients in the region. They will run your entire HSE program and attend all client meetings to ensure that all HSE matter is being dealt with in a timely manner.

First Class Field HSE Representatives

Our HSE reps include certified CRSP's and NCSO's and all our HSE professionals are trained and developed under our program that focuses on the oil sands and all the services that we provide. They are available to work all shifts and locations.

iSafety is proud to be a part of a program that hires young aboriginals and trains them to start a career in the HSE field. We are both hoping that this will grow into RAP program or some sort of on the job training.

Certified Incident Investigators

- We have certified investigators in SCAT and TapROOT that conduct and write up investigation findings and present to clients

Pre-qualification systems

iSafety offers online helps to contractors using ISNetworld, PICS, ComplyWorks, Canqual. We can administrate each of your online profiles to ensure you have a green flag at all times. We also provide coaching through the prequalification process.

Field and Management Systems Auditors

We conduct small focus audits to full program audits. We also do COR audits for clients trying to get their safety recognition through ACSA.

Facilitators

We have trained facilitators to conduct all types of Risk Assessments, HAZOPS, Job Safety Analysis, MOC and Emergency Response planning. iSafety also offers facilitators to conduct the orientation packages.

Implementation

- We guide the client through the implementation of their newly developed or updated HSE management system. We help our clients understand each element of the program from policies and standards to the documentation, tracking systems, and processes required to manage the program

System Support

We can help with any aspect of the HSE program, from creating tracking systems to developing tool box/ safety talks, analysis systems, procedures/practices, action logs, incident tracking and hazard assessment.

Staffing

- iSafety's Field Resources Division is designed not only to provide quality advisors to our clients, but to also provide tools, resources, and support to our advisors for a strong successful career path.
- We offer safety personnel on a temporary, permanent, long, and short term basis to cater to our client's needs.
- We provide safety advisors, coordinators, administrators (HSA's), supervisors, and managers to support and integrate into our clients' operational team.
- Our field personnel methodologies empower our department to determine the quality behind the resume and tap into the candidates' work personalities, habits, soft skills, and personal attributes.

Staffing

- We can provide manpower for the following:
 - ✓ Shutdown/Turn Around Safety support staff
 - ✓ Rigging
 - ✓ Rescue Teams
 - ✓ Flaggers
 - ✓ Gas Detection Technicians
 - ✓ Commercial Construction
 - ✓ Air Technicians
 - ✓ Industrial Construction
 - ✓ Fire watch
 - ✓ Vacation/Absence Relief
 - ✓ Manwatch
